

What's New?

RezStream "SystemLink" adds new support for VingCard and Saflok electronic door lock systems!

RezStream SystemLink has the capability to connect to numerous third party hospitality systems and then automatically transfer vital information from these systems directly into RezStream Professional property management software (PMS).

RezStream SystemLink now supports **VingCard** and **Saflok** key card interfaces. VingCard and Saflok are household names in the electronic door lock and hospitality security industry. RezStream SystemLink now interfaces with these well known key lock systems to allow you to quickly create electronic room key cards, with various levels of security access, depending your guest(s)' status. You can instantly create room keys, enhance security for both your guests and your property, and conveniently link your electronic door lock system with RezStream Professional.

Imagine the convenience of using just *one* system that connects all your third party devices with your PMS and allows you to access crucial information when you need it most. RezStream SystemLink saves you time, creates peace of mind, and makes third party hospitality system integration a breeze.

What devices are supported?

RezStream SystemLink connects to most point of sale systems such as Micros, Aloha, Digital Dining, Squirrel, and Positouch. RezStream SystemLink automatically transfers guest charges from point of sale systems directly into RezStream Professional. RezStream SystemLink can also support additional devices such as call accounting systems, key card integration systems, in-room movies systems, etc.

How does it work?

RezStream SystemLink utilizes a unique universal data transfer protocol that allows it to easily communicate with multiple third party devices at the same time. RezStream SystemLink provides two-way communication and then transfers important data from these devices directly into RezStream Professional PMS. Important financial information and guest charges are instantly posted to guest folios (i.e. invoices). Whether you want to connect one system or many, RezStream SystemLink can help you simplify your third party device integration needs!

What does it cost?

The cost for implementing RezStream SystemLink varies depending on the number of devices you wish to connect and your current network configuration. Call RezStream sales at 866-360-8210 for more information on SystemLink pricing.
