

RezStream is pleased to announce the release of its brand new credit card processing module!

RezStream has partnered with Payment Processing Inc. (PPI), to release a brand new credit card processing module to ensure hospitality businesses lower rates and better service. Call RezStream sales at 866-360-8210 to order your new credit card module today. **Through January 31, 2008**, RezStream customers who are not currently using RezStream to process payments can get this new module for the special price of **\$349.00 (a savings of \$300.00)**! Existing RezStream credit card gateway users may switch to this new gateway for the special price of **\$199.00**.

RezStream's new credit card processing module works with PPI credit card merchant accounts to provide unsurpassed convenience in credit card processing. Process credit card deposits, pre-authorize credit amounts (for the lowest rates), or retail swiped transactions directly from within RezStream Professional! You can eliminate costly hardware, save time, money, and protect your valuable data!

Key features of the new RezStream credit card module include:

- **Lower pricing!** Credit card processing rates are diverse and the processing rules are complicated. RezStream and PPI have partnered to ensure that hospitality businesses always get the lowest rates possible for each type of transaction they process. The new RezStream credit card module is "lodging certified." If your business also processes advanced deposits, full payment before, or at check-in, this new gateway will yield the lowest rates possible. Say goodbye to "teaser rates" and other gateways that promise low rates only to penalize your business for not following the "exact rules" to get the lowest rates.
- **No per attempt fees!** The new RezStream credit card processing gateway has no per attempt processing fees. Most gateways charge 10-25 cents per attempt!
- **One stop shopping!** Get your merchant account and processing services from ONE company. PPI is an industry leader in credit card processing merchant account and Internet gateway services. You will have just one number to call if you need assistance.
- **Works in Canada!** RezStream is pleased to offer this new gateway to our Canadian customers. Many credit card gateways do not offer services to businesses in Canada. The new RezStream credit card gateway fully supports Canadian businesses.
- **Keeps valuable data safe!** PCI's Internet gateway is PCI and PABA compliant. In addition, RezStream Professional uses 256 bit encryption, and other security features, to protect your valuable credit card information.

Can I use my current merchant account provider with the PPI gateway?

No, you **MUST** get a merchant account with PPI to ensure the lowest rates possible and better service. PPI will be happy to look at your current credit card statement and give you an estimate of the amount you can save by using the new RezStream credit card gateway. In most cases the savings are substantial.

Call 866-360-8210 today for more information about the new RezStream credit card processing gateway.
