

## **For Immediate Release**

5/07/2007

Denver, Colorado

Effective immediately, **RezStream**, a national leader in hospitality solutions, is pleased to announce the release of its new comprehensive Global Distribution System (GDS) module. RezStream, in partnership with InnLink Central Reservation Services, now offers a two-way GDS link that automatically transfers all GDS reservations directly into both the RezStream Booking Engine and RezStream Professional PMS. For added convenience, existing GDS reservation cancellations and GDS reservation changes are also processed without manual entry.

RezStream, located in Denver, Colorado, provides property management software and real-time Internet reservation products for hotels, motels, condominium and vacation rentals, property management rentals, dude ranches, spas, campgrounds, RV parks and marinas, and now, bed and breakfasts, inns, and similar businesses. RezStream serves over 1,000 unique lodging clients.

### **Key RezStream two-way GDS module benefits:**

- Low flat fee per reservation pricing. No expensive percentages to pay!
- Automatic two-way GDS connection written in the latest .Net platform.
- Automatically receive GDS reservations 24 hours a day, 365 days a year.
- No manual entry of new GDS reservations, existing GDS reservation changes, or cancelled GDS reservations.
- Custom GDS confirmation numbers.
- Reservation reports now available for all RezStream GDS reservations based on arrival dates or dates that the reservation was made.
- Performance monitoring by RezStream's experienced support team.
- Helpful 24/7 technical support via InnLink.

RezStream continues to improve and enhance their flagship products, **RezStream Professional PMS and the RezStream Booking Engine**, and has created additional products such as **RezStream Website Design, Hosting, & Promotion** to increase website revenue and online reservations.
